# SECTION 1: Synopsis of Operations

## INTRODUCTION TO THE PROJECT AND OPPORTUNITY

The subject property (9900 Horn Road) is a 19,938-square foot multi-tenant industrial property located in Sacramento, California. More specifically, the property is strategically located in the Brookside Industrial Park near the intersection of Highway 50 and Bradshaw Road, within the City of Sacramento. Brookside Industrial Park is a 5-building industrial park situated at the intersection of Horn Road and Fite Circle. The property is currently 100 percent occupied by two tenants with one of them being the seller. Built in 1986, the property is well-maintained and shows well. Located just northeast of the Highway 50 and Bradshaw Road interchange, the property is ideally located for transportation to the greater Sacramento area.

Sacramento is not only California's state capital, but also a growing metropolitan region within the eighth largest world economy. It is the largest city in a six-county region, serving a population close to 500,000 in the city and nearly 2.5

million people in the region. Sacramento continues to be a choice for the growing population of people seeking an affordable live-work-play lifestyle giving its proximity to the Bay Area, Napa Valley, and Lake Tahoe.

## THE TENANTS

**MILLENNIUM TERMITE AND PEST** is a local pest control company with 26 employees (16 of which are in the field) serving the 5-county metropolitan area. Millennium Termite and Pest is owned and operated by Robert Erickson, the seller of the building. As part of the purchase, Millennium Termite and Pest agree to execute a 5-year lease agreement commencing upon the close of escrow with a 5-year option.

**BIBLE FELLOWSHIP BAPTIST CHURCH** has been around Sacramento for 40 years and a tenant in the building for 30 years. In September 2013, the Bible Fellowship Baptist Church entered into a 5 year lease with Robert Erickson at \$5,106 per month, gross. A gross lease is where the landlord pays all property taxes, fire and liability insurance and maintenance. The lease has since expired and the church remains in

holdover on a month to month basis. The rent has not been increased since the lease inception in September of 2013. The church has been presented with a proposal (a copy of which can be found in the supporting documents) for a 5-year lease with a 5-year option starting at their current rent plus a 10 percent increase, triple net. A triple net lease is where the tenant pays its share of the property taxes, fire and liability insurance and maintenance. If the church does not sign the lease, they have been told that they will be evicted at the end of 4 months. The church as indicated that they have looked a buying their own building or merging their church with another in the Ranch Cordova/Sacramento area that owns their own facility.

## THE MARKET

**Sacramento** is the capital city of the U.S. state of California and the seat and largest city of Sacramento County. Located at the confluence of the Sacramento and American River in Northern California's Sacramento Valley, Sacramento's 2020 population of 524,943 makes it the sixth-largest city in California and the ninth-largest capital in the United States. Sacramento is the seat of the California Legislature and the Governor of California, making it the state's political center and a hub for lobbying and think tanks.

Sacramento is also the cultural and economic core of the Greater Sacramento area, which at the 2020 census had a population of 2,680,831, the fourth-largest metropolitan area in California.

Before the arrival of the Spanish, the area was inhabited by the historic Nisenan, Maidu, and other indigenous peoples of California. Spanish cavalryman Gabriel Moraga surveyed and named the *Río del Santísimo Sacramento* (Sacramento River) in 1808, after the Blessed Sacrament. In 1839, Juan Bautista Alvarado, Mexican governor of Alta California, granted the responsibility of colonizing the Sacramento Valley to Swiss-born Mexican citizen John Augustus Sutter, who subsequently established Sutter's Fort and the settlement at the *Rancho Nueva Helvetia*. Following the American Conquest of California and the 1848 Treaty of Guadalupe-Hidalgo, the waterfront developed by Sutter began to be developed, and incorporated in 1850 as the City of Sacramento.

Sacramento is the fastest-growing major city in California, owing to its status as a notable political center on the West Coast and as a major educational hub, home of California State University, Sacramento and University of California, Davis. Similarly, Sacramento is a major center for the California healthcare industry, as the seat of Sutter Health, the world-renowned UC Davis Medical Center, and the UC Davis School of Medicine. It is a tourist destination, featuring the California Museum, Crocker Art Museum, California State Railroad, Museum, California Hall of Fame, and Old Sacramento State Historic Park. Sacramento International Airport, located northwest of the city, is the city's major airport.

Sacramento is known for its evolving contemporary culture and is dubbed the most "hipster city" in California. In 2012, the Harvard University Civil Rights Project conducted for *Time* magazine ranked Sacramento as "America's Most Diverse City"

## INVESTOR SUITABILITY STANDARDS

Prospective purchasers of the Units offered by this Memorandum should give careful consideration to certain risk factors described under "RISK FACTORS" section; especially to the speculative nature of this investment, the limitations described under that caption with respect to the lack of a readily available market for the Units, and the resulting long-term nature of any investment in the Company. This Offering is available only to suitable Accredited Investors having adequate means to assume such risks and of otherwise providing for their current needs and contingencies.

### GENERAL

The Units will not be sold to any person unless such prospective purchaser or his or her duly authorized representative shall have represented in writing to the Company in a Subscription Agreement that:

- The prospective purchaser has adequate means of providing for his or her current needs and personal contingencies and has no need for liquidity in the investment of the Units;
- The prospective purchaser's overall commitment to investments which are not readily marketable is not

disproportionate to his, her, or its net worth and the investment in the Units will not cause such overall commitment to become excessive; and

- The prospective purchaser is an “Accredited Investor” (as defined below) suitable for purchase in the Units.

Each person acquiring Units will be required to represent that he, she, or it is purchasing the Units for his, her, or its own account for investment purposes and not with a view to resale or distribution. Taylor Building Investors, a California corporation, reserves the right to purchase some of units or arrange for a lender to purchase some of the units to be resold latter so as to have adequate monies to fund the company.

### **ACCREDITED INVESTORS**

The Company will conduct the Offering in such a manner that Units may be sold only to “Accredited Investors” as that term is defined in Rule 501(a) of Regulation D promulgated under the Securities Act of 1933 (the “Securities Act”). In summary, a prospective investor will qualify as an “Accredited Investor” if he, she, or it meets any one of the following criteria:

- Any natural person whose individual net worth, or joint net worth with that person’s spouse, at the time of his purchase, exceeds \$1,400,000. Except as provided in paragraph (2) of this section, for purposes of calculating net worth under this paragraph:

  - (ii) Indebtedness that is secured by the person’s primary residence, up to the estimated fair market value of the primary residence at the time of the sale of securities, shall not be included as a liability (except that if the amount of such indebtedness outstanding at the time of the sale of securities exceeds the amount outstanding 60 days before such time, other than as a result of the acquisition of the primary residence, the amount of such excess shall be included as a liability); and (iii) Indebtedness that is secured by the person’s primary residence in excess of the estimated fair market value of the primary residence at the time of the sale of securities shall be included as a liability.
- Any natural person who had an individual income in excess of \$280,000 in each of the two most recent years or joint income with that person’s spouse in excess of \$300,000 in each of those years and who has a reasonable expectation of reaching the same income level in the current year;

- Any entity in which all the equity owners are Accredited Investors.

## **OTHER REQUIREMENTS**

No subscription for the Units will be accepted from any investor unless he is acquiring the Units for his own account (or accounts as to which he has sole investment discretion), for investment and without any view to sale, distribution or disposition thereof. Each prospective purchaser of Units may be required to furnish such information as the Company may require to determine whether any person or entity purchasing Units is an Accredited Investor.

## **FORWARD-LOOKING INFORMATION**

Some of the statements contained in this Memorandum, including information incorporated by reference, discuss future expectations, or state other forward looking information. Those statements are subject to known and unknown risks, uncertainties and other factors, several of which are beyond the Company's control, which could cause the actual results to differ materially from those contemplated by the statements.

The forward-looking information is based on various factors and was derived using numerous assumptions. In lieu of the risks, assumptions, and uncertainties involved, there can be no assurance that the forward-looking information contained in this Memorandum will in fact transpire or prove to be accurate.

Important factors that may cause the actual results to differ from those expressed within may include, but are not limited to:

- The success or failure of the Company's efforts to successfully execute its business plan as scheduled;
- The Company's ability to attract future tenants for the real estate asset acquired;
- The Company's ability to attract and retain quality employees;
- The effect of changing economic conditions including the market in the area of operation for the Company;
- The reliance of the Company on certain key members of management

These along with other risks, which are described under "CERTAIN RISK FACTORS" may be described in future communications to partners. The Company makes no representation and undertakes no obligation to update the forward-looking information to reflect actual results or changes in assumptions or other factors that could affect those statements.

## **CERTAIN RISK FACTORS**

9900 Horn Road LP shall commence preliminary business development operations upon the close of escrow and is organized as a Limited Partnership under the laws of the State of California. Accordingly, the Company has only a limited history upon which an evaluation of its prospects and future performance can be made. The Company's proposed operations are subject to all operational risks associated with business enterprises. The likelihood of the Company's success must be considered in lieu of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with development, operation in a competitive industry, and the continued development of advertising, promotions and a corresponding customer base. There is a possibility that the Company could sustain losses in the future.

There can be no assurances that 9900 Horn Road LP will operate profitably. An investment in the Units involves a number of risks. You should carefully consider the following risks and other information in this Memorandum before purchasing our Units. Without limiting the generality of the foregoing, Investors should consider, among other things, the following risk factors:

### **Inadequacy of Funds:**

Gross offering proceeds of a maximum of \$1,400,000 may be realized. Management believes that such proceeds will capitalize and sustain the 9900 Horn Road LP sufficiently to allow for the implementation of the Company's Business Plans. If only a fraction of this Offering is sold, or if certain assumptions contained in Management's business plans prove to be incorrect, the Company may have inadequate funds to fully develop its business and may need debt financing or other capital investment to fully implement the Company's business plans.

### **Dependence Upon Management:**

In the early stages of development, the Company's business will be significantly dependent on the Company's management team. The Company's success will be particularly dependent upon Taylor Building Managers LLC, Timothy Taylor. The loss of a primary manager could have a material adverse effect on the Company. See "MANAGEMENT" section.

**Risks Associated With Expansion:**

The Company plans on expanding its business through the acquisition and/or development of real estate. Any expansion of operations the Company may undertake will entail risks, such actions may involve specific operational activities which may negatively impact the profitability of the Company. Consequently, the Limited Partners must assume the risk that such expansion may ultimately involve expenditures of funds beyond the resources available to the Company at that time, and (ii) management of such expanded operations may divert Management's attention and resources away from its existing operations, all of which factors may have a material adverse effect on the Company's present and prospective business activities.

**General Economic Conditions:**

The financial success of the Company may be sensitive to adverse changes in general economic conditions in the United States, such as recession, inflation, unemployment, and interest rates. Such changing conditions could reduce demand in the marketplace for the Company's real estate units. 9900 Horn Road LP has no control over these changes.

**Possible Fluctuations in Operating Results:**

The Company's operating results may fluctuate significantly from period to period because of a variety of factors, including purchasing patterns of customers, competitive pricing, debt service and principal reduction payments, and general economic conditions. Consequently, the Company's revenues may vary by quarter, and the Company's operating results may experience fluctuations.

**Risks of Borrowing:**

If the Company incurs indebtedness, a portion of its cash flow will have to be dedicated to the payment of principal and interest on such indebtedness. Typical loan agreements also might contain restrictive covenants which may impair the Company's operating flexibility. Such loan agreements would also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of owners of Limited Partnership Units of the Company. A judgment creditor would have the right to foreclose on any of the Company's assets resulting in a material adverse effect on the Company's business, operating results or financial condition.

**Unanticipated Obstacles to Execution of the Business Plan:**

The Company's business plans may change. Some of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in lieu of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

**Management Discretion as To Use Of Proceeds:**

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Limited Partners, in order to address changed circumstances or opportunities. Because of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Limited Partnership Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

**Control by Management:**

As of June 30, 2024, the Company's General Partners will own 100% of the Company's issued GP Voting Units. Upon completion of this Offering, the Company's Managers will continue to own approximately 0.0% of then-issued and

outstanding voting Units and will be able to continue to control the 9900 Horn Road LP.

**Limited Transferability & Liquidity:**

To satisfy the requirements of certain exemptions from registration under the Securities Act, and to conform with applicable state securities laws, each investor must acquire his Units for investment purposes only and not with a view towards distribution. Consequently, certain conditions of the Securities Act may need to be satisfied prior to any sale, transfer, or other disposition of the Units. Some of these conditions may include a minimum holding period, availability of certain reports, including financial statements from 9900 Horn Road LP, limitations on the percentage of Units sold and the manner in which they are sold. 9900 Horn Road LP can prohibit any sale, transfer or disposition unless it receives an opinion of counsel provided at the holder's expense, in a form satisfactory to 9900 Horn Road LP, stating that the proposed sale, transfer or other disposition will not result in a violation of applicable federal or state securities laws and regulations. No public market exists for the Units and no market is expected to develop. Consequently, owners of the Units may have to hold their investment indefinitely and may not be able to liquidate their investments in 9900 Horn Road LP or pledge them as collateral for a loan in the event of an emergency.

**Broker - Dealer Sales of Units:**

The Company's Limited Partnership Units are not presently included for trading on any exchange, and there can be no assurances that the Company will ultimately be registered on any exchange. No assurance can be given that the Limited Partnership Units of the Company will ever qualify for inclusion on the NASDAQ System or any other trading market. As a result, the Company's Limited Partnership Units are covered by a Securities and Exchange Commission rule that opposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and accredited investors. For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell the Company's securities and may also affect the ability of shareholders to sell their Units in the secondary market.

**Long-term Nature of Investment:**

An investment in the Units may be long-term and illiquid. As discussed above, the offer and sale of the Units will not be registered under the Securities Act or any foreign or state securities laws by reason of exemptions from such registration which depends in part on the investment intent of the investors. Prospective investors will be required to represent in writing that they are purchasing the Units for their own account for long-term investment and not with a view towards resale or distribution. Accordingly, purchasers of Units must be willing and able to bear the economic risk of their investment for an indefinite period of time. It is likely that investors will not be able to liquidate their investment in the event of an emergency.

**No Current Market for Units:**

There is no current market for the Units offered in this private Offering and no market is expected to develop in the near future.

**Offering Price:**

The price of the Units offered has been arbitrarily established by 9900 Horn Road LP, considering such matters as the state of the Company's business development and the general condition of the industry in which it operates. The Offering price bears little relationship to the assets, net worth, or any other objective criteria of value applicable to 9900 Horn Road LP.

**Compliance with Securities Laws:**

The Units are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act, applicable California Securities Laws, and other applicable state securities laws. If the sale of Units were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of Units. If a number of purchasers were to obtain rescission, 9900 Horn Road LP would face significant financial demands which could adversely affect 9900 Horn Road LP as a whole, as well as any non-rescinding purchasers.

**Lack of Firm Underwriter:**

The Units are offered on a "best efforts" basis by the officers and directors of 9900 Horn Road LP. Accordingly, there

is no assurance that the Company will sell the maximum Units offered or any lesser amount.

**Projections:**

Management has prepared projections regarding 9900 Horn Road LP's anticipated financial performance. The Company's projections are hypothetical and based upon factors influencing the business of 9900 Horn Road LP. The projections are based on Management's best estimate of the probable results of operations of the Company, based on present circumstances, and have not been reviewed by the 9900 Horn Road's independent accountants. These projections are based on several assumptions, set forth therein, which Management believes are reasonable. Some assumptions upon which the projections are based, however, invariably will not materialize due the inevitable occurrence of unanticipated events and circumstances beyond Management's control. Therefore, actual results of operations will vary from the projections, and such variances may be material. Assumptions regarding future changes in sales and revenues are necessarily speculative in nature.

In addition, projections do not and cannot take into account such factors as general economic conditions, unforeseen regulatory changes, the entry into the Company's market of additional competitors, the terms and conditions of future capitalization, and other risks inherent to the Company's business. While Management believes that the projections accurately reflect possible future results of 9900 Horn Road LP's operations, those results cannot be guaranteed.

**Our success will depend upon the development of real estate, and we may be unable to consummate acquisitions or dispositions on advantageous terms, the acquired property may not perform as we expect, or we may be unable to efficiently integrate our project into our existing operations:**

We intend to acquire and sell a specific real estate asset. The acquisition of real estate entails various risks, including the risks that our real estate asset may not perform as we expect, that we may be unable to quickly and efficiently integrate the asset into our existing operations and that our cost estimates for the acquisition, maintenance and/or sale of a property may prove inaccurate.

**Reliance on Management to Manage Property:**

The Company's ability to achieve its investment objectives is partially dependent upon the performance of the Management team, the quality and timeliness of the Company's acquisition of the target real estate property and the quality of the management of the asset. Investors in the Units offered will have no opportunity to evaluate the terms of transactions or other economic or financial data concerning the Company's investment. Investors in the Units must rely entirely on the management ability of and the oversight of the Company's principals.

**Competition May Increase Costs:**

The Company will experience competition from other sellers of real estate and other real estate projects. Competition may have the effect of increasing acquisition costs for the Company and decreasing the sales price or lease rates of developed assets.

**Delays in Disposition of Company Real Estate:**

Delays the Manager may encounter in the disposition of the Company's primary real estate asset could adversely affect the profitability of the Company. The Company may also experience delays in identifying suitable tenants that meet the Company's ideal parameters.

**Environmentally Hazardous Property:**

Under various Federal, City and local environmental laws, ordinances and regulations, a current or previous owner or operator of real property may be liable for the cost of removal or remediation of hazardous or toxic substances on, under or in such property. Such laws often impose liability whether or not the owner or operator knew of, or was responsible for, the presence of such hazardous or toxic substances. Environmental laws also may impose restrictions on the manner in which property may be used or businesses may be operated, and these restrictions may require expenditures. Environmental laws provide for sanctions in the event of non-compliance and may be enforced by governmental agencies or, in certain circumstances, by private parties. In connection with the acquisition and ownership of its properties, the Company may be potentially liable for such costs. The cost of defending against claims of liability, complying with environmental regulatory requirements or remediation any contaminated property could materially adversely affect the business, assets or results of operations of the Company.

**Management's Discretion In The Future Disposition of Properties:**

The Company cannot predict with any certainty the various market conditions affecting real estate investments which will exist at any certain time in the future. Due to the uncertainty of market conditions which may affect the future disposition of the Company's properties, the Company cannot assure you that it will be able to sell its properties at a profit in the future. Accordingly, the timing of liquidation of the Company's real estate investments will be dependent upon fluctuating market conditions.

**Real estate investments are not as liquid as other types of assets, which may reduce economic returns to investors:**

Real estate investments are not as liquid as other types of investments, and this lack of liquidity may limit our ability to react promptly to changes in economic, financial, investment or other conditions. In addition, significant expenditures associated with real estate investments, such as mortgage payments, real estate taxes and maintenance costs, are generally not reduced when circumstances cause a reduction in income from the investments. Thus, our ability at any time to sell assets or contribute assets to property funds or other entities in which we have an ownership interest may be restricted. This lack of liquidity may limit our ability to vary our portfolio promptly in response to changes in economic financial, investment or other conditions and, as a result, could adversely affect our financial condition, results of operations, and cash flows.

**We may be unable to sell the property if or when we decide to do so, including as a result of uncertain market conditions, which could adversely affect the return on an investment in our company:**

Our ability to dispose of properties on advantageous terms depends on factors beyond our control, including competition from other sellers and the availability of attractive financing for potential buyers of the properties we acquire. We cannot predict the various market conditions affecting real estate investments which will exist at any particular time in the future. Due to the uncertainty of market conditions which may affect the future disposition of the properties we acquire, we cannot assure our Limited Partners that we will be able to sell such properties at a profit in the future. Accordingly, the extent to which our Limited Partners will receive cash distributions and realize potential appreciation on our real estate investments will be dependent upon fluctuating market conditions. Furthermore, we may be required to expend funds to correct defects or to make improvements before a property can be sold. We cannot assure our Limited partners that we will have funds available to correct such defects or to make such improvements. In acquiring a property, we may agree to restrictions that prohibit the sale of that property for a period of time or impose other restrictions, such as a limitation on the amount of debt that can be placed or repaid on that property. These provisions would restrict our ability to sell a property.

**Illiquidity of real estate investments could significantly impede the company's ability to respond to adverse changes in the performance of the portfolio investments and harm the company's financial condition:**

Since real estate investments are relatively illiquid, the Company's ability to promptly sell developed assets in response to changing economic, financial and investment conditions may be limited. These risks could arise from weakness in or even the lack of an established market for a property, changes in the financial condition or prospects of prospective purchasers, changes in local, regional national or international economic conditions, and changes in laws, regulations or fiscal policies of jurisdictions in which the property is located. The Company may be unable to realize its investment objectives by sale, other disposition or refinance at attractive prices within any given period of time or may otherwise be unable to complete any exit strategy.

**The terms of new or renewal leases may result in a reduction in income:**

Should the Company lease its real estate properties, the terms of any such new or renewal leases may be less favorable to the Company than the previous lease terms. Certain significant expenditures that the Company, as a landlord, may be responsible for, such as: mortgage payments, real estate taxes, utilities, and maintenance costs; are not generally reduced due to a reduction in rental revenues. If lease rates for new or renewal leases are substantially lower than those for the previous leases, Company's rental income might suffer a significant reduction. Additionally, the Company may not be able to sell a property at the price, on the terms, or within the time frame it may seek. Accordingly, the timing of liquidation of the Company and the extent to which Investor Limited Partners may receive distributions and realize potential appreciation on the Company's real estate investments, may be dependent upon fluctuating market conditions. The price the Company obtains from the sale of a property will depend upon varying factors: the property's operating history, demographic trends in the property's locale, available financing, and the tax treatment of real estate investments. The Company may not realize significant appreciation and may even incur losses on its properties and

other investments. The recovery of any portion or whole of an Investor Limited Partner's investment and any potential return thereon, will depend on the amount of net proceeds the Company is able to realize from a sale or other disposition of its properties.

**Property the Company acquires may have liabilities or other problems:**

The Company intends to perform appropriate due diligence for each property or other real estate related investment it acquires. The Company will also seek to obtain appropriate representations and indemnities, from sellers, in respect of such properties or other investments. Nevertheless, the Company may acquire properties or other investments that are subject to uninsured liabilities or that may otherwise have problems. In some instances, the Company may have only limited or perhaps even no recourse for any such liabilities or other problems. Adversely, if the Company has received indemnification from a seller, the resources of such seller may not be adequate to fulfill its indemnity obligation. As a result, the Company could be required to resolve or cure any such liability or other problems, and such payment could have an adverse effect on the Company's cash flow available to meet other expenses or to make distributions to Investor Limited Partners.

**The Company's investments may be subject to risks from the use of borrowed funds:**

The Company may acquire properties subject to existing financing or by borrowing funds. The Company may also incur or increase its indebtedness by obtaining loans secured by certain of its properties in order to use the proceeds for acquisition of additional properties. In general, for any particular property, the Company will expect that the property's cash flow will be sufficient to pay the cost of its mortgage indebtedness, in addition to the operating and related costs of the property. However, if there is insufficient cash flow from the property, the Company may be required to use funds from other sources to make the required debt service payments, which generally would reduce the amount available for distribution to Investor Limited Partners. The incurrence of mortgage indebtedness increases the risk of loss from the Company's investments since one or more defaults on mortgage loans secured by its properties could result in foreclosure of those mortgage loans by the lenders with a resulting loss of the Company's investment in the properties securing the loans. For tax purposes, a foreclosure of one of the Company's properties would be treated as a sale of the property for a purchase price equal to the outstanding balance of the indebtedness secured by the mortgage. If that outstanding balance exceeds the Company's tax basis in the property, the Company would recognize a taxable gain as a result of the foreclosure, but it would not receive any cash proceeds as a result of the transaction.

Mortgage loans or other financing arrangements with balloon payments in which all or a substantial portion of the original principal amount of the loan is due at maturity, may involve greater risk of loss than those financing arrangements in which the principal amount of the loan is amortized over its term. At the time a balloon payment is due, the Company may or may not be able to obtain alternative financing on favorable terms, or at all, to make the balloon payment or to sell the property in order to make the balloon payment out of the sale proceeds. If interest rates are higher when the Company obtains replacement financing for its existing loans, the cash flows from its properties, as well as the amounts the Company may be able to distribute to Investor Limited Partners, could be reduced. If interest rates are higher when the Company obtains replacement financing for its existing loans, the cash flows from its properties, as well as the amounts the Company may be able to distribute to Investor Limited Partners, could be reduced. In some instances, the Company may only be able to obtain recourse financing, in which case, in addition to the property or other investment securing the loan, the lender may also seek to recover against the Company's other assets for repayment of the debt. Accordingly, if the Company does not repay a recourse loan from the sale or refinancing of the property or other investment securing the loan, the lender may seek to obtain repayment from one or more of such other assets.

**Uninsured losses relating to real property may adversely affect an investor Limited Partner's return:**

The General Partner will attempt to assure that all of the Company's properties are comprehensively insured (including liability, fire, and extended coverage) in amount sufficient to permit replacement in the event of a total loss, subject to applicable deductibles. However, to the extent of any such deductible and/or in the event that any of the Company's properties incurs a casualty loss which is not fully covered by insurance, the value of the Company's assets will be reduced by any such loss. Also, certain types of losses, generally of a catastrophic nature, resulting from, among other things, earthquakes, floods, hurricanes or terrorist acts may not be insurable or even if they are, such losses may not be insurable on terms commercially reasonable to the Company. Further, the Company may not have a sufficient external source of funding to repair or reconstruct a damaged property; there can be no assurance that any such source of funding will be available to the Company for such purposes in the future.

**Competition for investments may increase costs and reduce returns:**

The Company will experience competition for real property investments from individuals, corporations and bank and insurance company investment accounts, as well as other real estate limited partnerships, real estate investment funds, commercial developers, pension plans, other institutional and foreign investors and other entities engaged in real estate investment activities. The Company will compete against other potential purchasers of properties of high quality commercial properties leased to credit-worthy tenants and residential properties and, as a result of the weakened U.S. economy, there is greater competition for the properties of the type in which the Company will invest. Some of these competing entities may have greater financial and other resources allowing them to compete more effectively. This competition may result in the Company paying higher prices to acquire properties than it otherwise would. The Company may be unable to acquire properties that it believes meet its investment objectives and are otherwise desirable investments. In addition, the Company's properties may be located close to properties that are owned by other real estate investors and that compete with the Company for tenants. These competing properties may be better located and more suitable for desirable tenants than the Company's properties, resulting in a competitive advantage for these other properties. The Company may face similar competition from other properties that may be developed in the future. This competition may limit the Company's ability to lease space, increase its costs of securing tenants, limit its ability to charge rents, and/or require it to make capital improvements; it otherwise may not make to its properties. As a result, the Company may suffer reduced cash flow with a decrease in distributions it may be able to make to Investor Limited Partners.

**Environmental regulation and issues, certain of which the Company may have no control over, may adversely impact the Company's business:**

Federal, State and local laws and regulations impose environmental controls, disclosure rules and zoning restrictions which directly impact the management, development, use, and/or sale of real estate. Such laws and regulations tend to discourage sales, leasing activities, and mortgage lending with respect to some properties. These laws and regulations may adversely affect the Company specifically, and the real estate industry in general. Failure by the Company to uncover and adequately protect against environmental issues, in connection with a Portfolio Investment, may subject the Company to liability as the buyer of such property or asset. Environmental laws and regulations impose liability on current or previous real property owners or operators for the cost of investigating, cleaning up, or removing contamination caused by hazardous or toxic substances at the property.

The Company may be held liable for such costs as a subsequent owner and developer of such property. Liability can be imposed even if the original actions were legal and the Company had no knowledge of, or was not responsible for, the presence of the hazardous or toxic substances. The Company may also be held responsible for the entire payment of the liability if the Company is subject to joint and several liabilities and the other responsible parties are unable to pay. Further, the Company may be liable under common law to third parties for damages and injuries resulting from environmental contamination emanating from the site, including the presence of asbestos containing materials. Insurance for such matters may not be available.

**Real estate may develop harmful mold, which could lead to liability for adverse health effects and costs of remediating the problem:**

When excessive moisture accumulates in buildings or on building materials, mold growth may occur, particularly if the moisture problem remains undiscovered or is not addressed over a period of time. Some molds may produce airborne toxins or irritants. Concern about indoor exposure to mold has been increasing as exposure to mold may cause a variety of adverse health effects and symptoms, including allergic or other reactions. As a result, the presence of significant mold at any of our properties could require the Company to undertake a costly remediation program to contain or remove the mold from the affected property. In addition, the presence of significant mold could expose the Company to liability from its tenants, employees of such tenants and others if property damage or health concerns arise.

**Terrorist Attacks Or Other Acts Of Violence Or War May Affect The Industry In Which The Company Operates, Its Operations & Its Profitability:**

Terrorist attacks may harm the Company's results of operations and an Investor Limited Partner's investment. There can be no assurance that there will not be more terrorist attacks against the United States or U.S. businesses. These attacks or armed conflicts may directly or indirectly impact the value of the property the Company owns or that secure its loans. Losses resulting from these types of events may be uninsurable or not insurable to the full extent of the loss suffered.

**The Company will be subject to risks related to the geographic location of the property it develops:**

The Company intends to develop and sell real estate assets. If the commercial or residential real estate markets or general economic conditions in this geographic area decline, the Company may experience a greater rate of default by tenants on their leases with respect to properties in these areas and the value of the properties in these areas could decline. Any of these events could materially adversely affect the Company's business, financial condition or results of operations.

## **ERISA CONSIDERATIONS**

### **GENERAL**

When deciding whether to invest a portion of the assets of a qualified profit-sharing, pension or other retirement trust in the Company, a fiduciary should consider whether: (i) the investment is in accordance with the documents governing the particular plan; the investment satisfies the diversification requirements of Section 404(a)(1)(c) of Employee Retirement Income Security Act of 1974, as amended ("ERISA"); and (iii) the investment is prudent and in the exclusive interest of participants and beneficiaries of the plan.

### **PLAN ASSETS**

Under ERISA, whether the assets of the Company are considered "plan assets" is also critical. ERISA generally requires that "plan assets" be held in trust and that the trustee or a duly authorized Manager have exclusive authority and discretion to manage and control the assets. ERISA also imposes certain duties on persons who are "fiduciaries" of employee benefit plans and prohibits certain transactions between such plans and parties in interest (including fiduciaries) with respect to the assets of such plans. Under ERISA and the Code, "fiduciaries" with respect to a plan include persons who: (i) have any power of control, management or disposition over the funds or other property of the plan; (ii) actually provide investment advice for a fee; or (iii) have discretion with regard to plan administration. If the underlying assets of the Company are considered to be "plan assets," then the Manager(s) of the Company could be considered a fiduciary with respect to an investing employee benefit plan, and various transactions between Management or any affiliate and the Company, such as the payment of fees to Managers, might result in prohibited transactions. A regulation adopted by the Department of Labor generally defines plan assets as not to include the underlying assets of the issuer of the securities held by a plan. However, where a plan acquires an equity interest in an entity that is neither a publicly offered security nor a security issued by certain registered investment companies, the plan's assets include both the equity interest and an undivided interest in each of the underlying assets of the entity unless: (i) the entity is an operating company or; (ii) equity participation in the entity by benefit plan investors (as defined in the regulations) is not significant (i.e., less than twenty-five percent (25%) of any class of equity interests in the entity is held by benefit plan investors).

**Benefit plan investors are not expected to acquire twenty-five percent (25%) or more of the Units offered by the Company.** The management of the Company intends to preclude significant investment in the Company by such plans. Employee benefit plans (including IRAs), however, are urged to consult with their legal advisors before subscribing for the purchase of Units to ensure the investment is acceptable under ERISA regulations.
